The diagram shows a system boundary titled "Feature Flag & Dynamic Config Manager". Inside, there are seven use cases: UC-01 Create Feature Flag, UC-02 Configure Feature Flag, UC-03 Enable/Disable Feature Flag, UC-04 Modify Configuration Values, UC-05 View Feature Flags Across Environments, UC-06 Record Audit Log, and UC-07 Authenticate User. Two actors are shown: "software engineer" and "release manager". "software engineer" is associated with UC-01, UC-02, UC-03, UC-04, and UC-05. "release manager" is associated with UC-02, UC-03, UC-05, and UC-06. UC-03 has an "extend" relationship with UC-02. UC-04 has an "include" relationship with UC-06. UC-06 has a directed association to UC-07. A small thumbnail of the diagram is visible in the bottom right corner of the workspace.
